The wallet you get with a basic account is also a Coinbase wallet, even though it is not called that. That is de facto because you get a wallet with the basic account whether or not you ever get the app. If you don't get the app, then the only "coinbase wallet" you have is the one on coinbase.com. This differentiation is bullshit.

Cryptocurrency arbitrage is a strategy in which investors buy a cryptocurrency on one exchange and then quickly sell it on another exchange for a higher price. Cryptocurrencies like Bitcoin trade on hundreds of different exchanges, and sometimes, the price of a coin or token may differ on one exchange versus another.

Arbitrage is the concept of buying and selling cryptocurrency simultaneously but on different markets. This is because of the potential profit possible due to the price difference between the markets. This is not some revolutionary new concept, but a very old one which is used in all markets.
